

Indian Society for Trenchless Technology

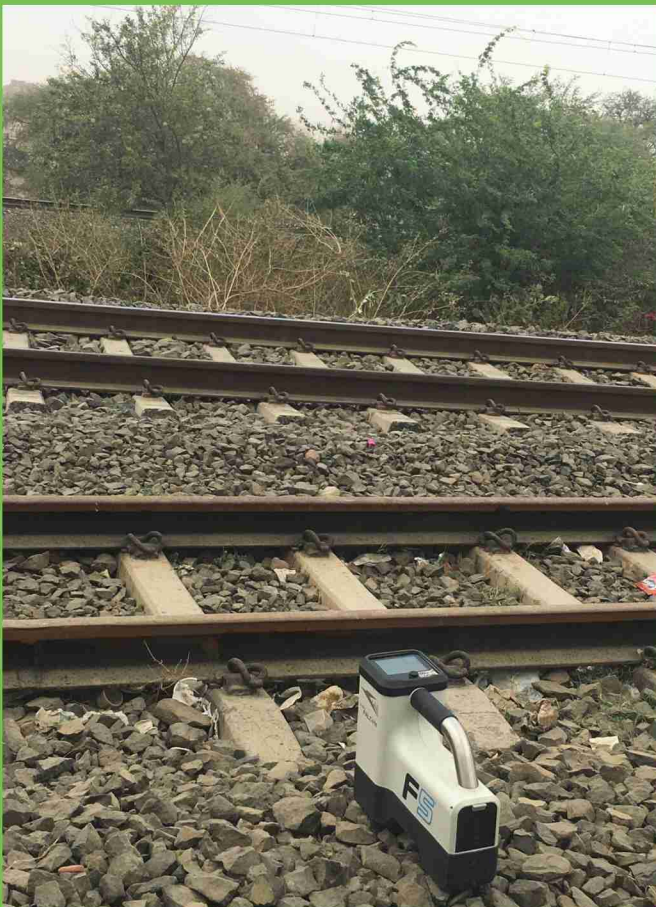

DCI India Pvt. Ltd.

# *Training on Advance HDD Locating*

*On 29th April 2016*

*At*

*VKP, Training Centre,  
Faridabad*

## **About Program**

Tracking of drill head is one of the most critical portion of pilot hole drilling operations. It require proper understanding of the basics of HDD, basics of drill head locating, signal interferences, and ways & means to overcome those. Subsequent to basics, one has to have the understanding of options available for advanced locating. Based on the above, one could optimize the HDD operations, avoid mistakes & plan the bore path. This training program aims to provide such inputs to participants.

To assess the knowledge gain from this program, a test is also built in the program. This test is optional & could be taken by the participants desirous of receiving the program certificate.

## **About Organizers**

The Indian Society for Trenchless Technology (IndSTT) is the apex autonomous organization to promote the application of Trenchless Technology in India. It was established in 1995 with the support of the Ministry of Urban Development, Govt. of India. During the ensuring sixteen years, IndSTT has supported the development of Trenchless Industry in India substantially & has made it one of the major markets for trenchless applications. IndSTT had successfully conducted several Trenchless events over this period. Subject program is one to provide continued Professional Training to trenchless stakeholders engaged in HDD works.

## **About Training Partners**

DCI is the Training Partner of the program. It is the market leader in tracking technology for trenchless construction works.
